

Partnerships for Success

School Ethos

It is expected that staff, students and the school community, will work within the school ethos in all communications, behaviours and interactions. The school ethos is a commitment to:

- **valuing learning as central to everything we do**
- **always aspiring to excellence**
- **valuing all members of the school community and treating them with respect**
- **celebrating the successes and achievements of all members of the school community**
- **reflecting on our own performance and taking responsibility for our own behaviour**
